◆ PROFILE

Senior full stack engineer with nearly nine years of experience designing, building and shipping production grade web applications and cloud platforms. I am **AWS certified** and specialise in the **AWS** ecosystem, including Lambda, EC2, CloudFormation, DynamoDB, S3 and API Gateway, and build rich, scalable products end to end with **React**, **Node.js** and **TypeScript**. I am also driving modern **AI engineering** into everyday delivery, using Gen AI coding agents and MCP servers to ship faster, optimise cost and raise code quality. Alongside this I have a strong track record architecting serverless and infrastructure as code solutions, leading agile teams, and delivering enterprise platforms trusted by hundreds of thousands of clients worldwide.

◆ CORE TECHNICAL SKILLS

Cloud & AWS	AWS	Lambda	EC2	CloudFormation	DynamoDB	S3	API Gateway	IAM
	CodePipeline	CodeBuild	CodeCommit					
AI Engineering	Gen AI Coding Agents	MCP Servers	AI Models	GitHub Copilot				
Languages & Runtimes	TypeScript	Node.js	JavaScript	HTML	SCSS / CSS	Bash		
Frontend	React	Redux	Next.js	Angular	Micro-frontends	Tailwind CSS	CSS Modules	
	UI Frameworks							
Backend & Data	REST APIs	Serverless Functions	Cosmos DB	Azure				
Testing & QA	Jest	Enzyme	React Testing Library	Cypress	Selenium	WebdriverIO		
	BrowserStack							
DevOps & Tooling	Docker	Linux	Git	Webpack	Babel	Split Tunnel VPN		
Analytics & Platforms	Google Analytics	Adobe Experience Manager						

◆ PROFESSIONAL EXPERIENCE

Senior Full Stack Developer, ADP · Contract

Jan 2025 – Jul 2026
18 mos

Solutions architecting and agile software development

React · TypeScript · Gen AI · MCP Servers · GitHub Copilot · REST APIs · Tailwind CSS · Webpack · Cypress · React Testing Library

- Delivered complex enterprise features for ADP's payroll platform, taking work from concept through to production deployment for a product used by over 950,000 clients worldwide.

- Migrated legacy web applications to a modern, component based React UI library, improving performance, maintainability and developer efficiency.
- Built and released new features behind feature flags, enabling high customisation and controlled rollout across every environment.
- Drove modern Gen AI engineering practices, using coding agents and MCP servers to increase delivery speed, optimise token usage and raise code quality, and contributed to company hackathons and AI masterclasses led by industry experts.
- Improved accessibility across multiple web applications to meet WCAG standards and deliver a better experience for all users.

Lead Full Stack Developer, ERGO Travel Insurance

Apr 2024 – Nov 2024

7 mos

Project management, architecting and software development

Node.js TypeScript Next.js Serverless Functions REST APIs Azure Cosmos DB CSS Modules

- Architected, built and delivered production ready digital services for clients using Node.js, TypeScript and Next.js on a serverless cloud stack.
- Created and documented company wide development standards, covering best practices and ways of working.
- Built a new company website that scored 100 percent across the board on Google Lighthouse, reflecting a focus on highly performant, accessible sites with strong SEO.
- Produced clear, thorough architecture diagrams for every development project.
- Applied secure by design principles within the code and across the Azure infrastructure to protect services from attacks and risk.
- Managed multiple concurrent projects, running every phase of the software development lifecycle from design and planning through to delivery of enterprise grade services.
- Built the foundation for all future company projects, including a fully featured, optimised UI boilerplate and a Docker stack of local development Azure emulators.

Infrastructure Architect, Sopra Steria

Jun 2023 – Dec 2023

6 mos

Consulting, digital services and software development

Azure Cosmos DB REST APIs

- Single-handedly designed and architected a complete cloud infrastructure solution on Microsoft Azure to host a brand new microsite for UK Power Networks.
- Devised an optimised database schema by analysing the underlying data requirements.
- Implemented security measures to protect the service from attacks and risk.
- Produced detailed architecture diagrams and blueprinted the low level design, documenting the infrastructure and the decisions behind it.
- Led the development team through the design and planning phases, guiding them through the solution and its implementation.

Lead Software Engineer, Sopra Steria

Aug 2022 – Apr 2023

8 mos

Consulting, digital services and software development

Angular CSS HTML Jest Split Tunnel VPN

- Collaborated with a cross functional team to build traffic management portals for the Singapore Land Traffic Authority.
- Developed high quality Angular components and carried out extensive bugfixing across the codebase.
- Built a bespoke split tunnel VPN solution that gave the team access to environments secured behind a NAT.

Senior Full Stack Developer, IBM

Jan 2022 – Jul 2022

6 mos

Consulting, software development and leadership

React AWS TypeScript Node.js Lambda EC2 DynamoDB CloudFormation API Gateway S3
Redux Jest

- Led an agile development team building a brand new e-commerce journey for the Audi UK website, developing complex React components.
- Developed and integrated a comprehensive AWS stack spanning Lambda, EC2, S3, DynamoDB, API Gateway and IAM, with continuous delivery through CodeCommit, CodeBuild and CodePipeline.

- Scripted AWS CloudFormation stacks to fully automate the provisioning of new environments, and architected and documented the AWS infrastructure used to host third party code, collaborating with teams across the UK and Germany.
- Mentored several team members on career progression and personal development, driving pair and mob programming sessions, regular one to ones, learning resources and goal setting.
- Planned sprints, managed the team's workload and predicted issues and dependencies to mitigate risk.
- Presented regularly across multiple forums, especially to key client stakeholders, and pioneered and hosted the project's Technical Playback sessions to spark interest within the technical community and encourage learning.

Lead Front End Developer, IBM

Jan 2021 – Jan 2022

1 yr

Consulting, software development and leadership

React AWS TypeScript Redux JavaScript Jest Adobe Experience Manager Git

- Led a front end team from requirements gathering through to delivery, building a cutting edge solution that let content editors compose bespoke single page applications by dragging and dropping React micro-frontends onto a page.
- Developed an entire technical capability by building many highly complex React micro-frontends, and pioneered a custom approach for sharing a single Redux store across several independent React apps.
- Defined and enforced excellent coding standards within the team, writing thorough Jest and Enzyme unit tests to achieve 100 percent code coverage.
- Created GitHub workflows to automate building and deploying code.
- Mentored a junior developer, working closely with him on increasingly complex problems to support his growth, and managed the team's time to deliver within deadline.
- Produced detailed documentation with diagrams and ran several knowledge transfer sessions to upskill other teams in the new capability.
- Presented regularly to the client and other teams at sprint demos, showcasing progress.

Front End Developer, IBM

Aug 2018 – Jan 2021

2 yrs 5 mos

Consulting, software development and technology

React AWS TypeScript Redux JavaScript Jest Adobe Experience Manager

- Built new features for the Audi UK website within a fast paced agile team, creating high quality React apps with Redux using best practices.
- Wrote thorough unit and integration tests in Jest and Enzyme to ensure code robustness.
- Single-handedly architected and implemented the Cookie Control tool for the Audi UK website to ensure GDPR compliance.
- Migrated the legacy tech stack to AWS.
- Presented sprint work back to the client regularly at sprint demos.

QA / Tester, IBM

Jan 2018 – Aug 2018

7 mos

Consulting, software development and technology

React Node.js JavaScript Selenium BrowserStack HTML CSS JIRA

- Performed manual testing of web applications, raising and escalating defects through JIRA to the development team.
- Wrote automated tests using WebdriverIO and BrowserStack.
- Fixed minor front end bugs across the codebase.

◆ EDUCATION & CERTIFICATIONS

AWS Certified Cloud Practitioner

Certified

Amazon Web Services

BCS Software Development Apprenticeship

Aug 2018 – Apr 2020

Diploma, Distinction · Software Development

Samuel Whitbread Academy

Aug 2016 – Jun 2018

3 A-Levels
